

ERI's 2024 Impact Report: A Solid Foundation for Future Improvements in Metrics Reporting

Published: 17 June 2025 | Author: David Daoud

ERI's 2024 Impact Report offers a detailed look at the company's role in environmental IT and secure asset disposition. Despite being a privately-held business, ERI set out to be more transparent, making it one of the few ITAD and material recovery companies that offer a deeper look into its operations. With five years of voluntary disclosures now available, we examine what ERI gets right-particularly in operations and certifications-and where its reporting needs to make progress in the years to come, more specifically on reuse data, year-over-year trends and measurable ESG targets.
