Befesa Q3 2026 | German Alloy Expansion Could Increase Competition for Aluminum Scrap

Published: 4 November 2026 | Author: David Daoud

Befesa released its third-quarter results on October 28 as it prepared to ramp up secondary aluminum production at its Bernburg plant in Germany. The expansion raises the plant's annual alloy capacity from 75,000 to 135,000 metric tons. For sellers of recovered aluminum, including some electronics recyclers and IT asset disposition providers, the project shows a major downstream processor adding capacity while European scrap supply is already tight.
